Open Forum on “Current Situation and Policies on Ship Emission Control in Mainland China”

The forum was hosted by Dr. Meifeng Luo, the Centre Director, with Mr. Peng Chuansheng, a researcher in China Waterborne Transport Research Institute, a candidate (national level) for “the New Century Talent Project”, and a member of the International Port Association and PIANC Environmental Commission, as the guest speaker. During the forum, Mr. Peng talked about the current progress of air pollution control in water transport in Mainland China and shared his views on setting up Emission Control Areas (ECA), as well as the way forward.
